Are The Stars Hot or Cold? ~ Linda Anne Atterton

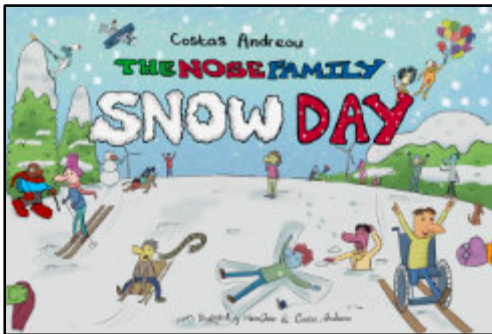

When Grace's father dies she is left with an uncaring mother and a brother, Chris, who becomes the centre of her world of sea and sand on the windswept Norfolk coast. Grace's mother remarries, and her rich stepfather pays for Chris to go to boarding school. Knowing that his dream is to become a doctor, Grace lets him go. The price she pays for her brother's dream is her own nightmare in the hands of her stepfather. She finds a way to escape by pretending she is somewhere safe, by turning into something else.

But how safe is the sea? How long can you hold your breath before you drown? When Grace, in desperation, turns to the sea for help, what will the sea demand from her in return?

Set on the remote Norfolk coastal village of Sea Palling during the 1970s, this emotional roller coaster of a novel about love and loss pulls no punches. It carries us through sunshine and shadow to a tempestuous end that, somehow, must also become a new beginning.

Bob Goddard

www.timbuktu-publishing.co.uk

Come with **Bob Goddard** to the **Land Of The Long Wild Road** where he recounts his tales of motorcycle adventure in New Zealand along with his wife, Viv. Covering 11,000 kilometres, it took them up volcanoes, across river beds and through rain forests on ancient Maori tracks, gold-prospectors' routes and sheep drovers' trails.

A few years later, and in support of the **EveryChild** charity, they took on Romania and Bulgaria for their next trip where they encountered not only horrendous roads but also the worst weather in living memory. The storms and floods they encountered riding through Romania claimed the lives of sixty-two people. But Bob and Viv not only survived but escaped alive from an unexpected night in a brothel! Read their exploits in **Beyond Bucharest**.

In between the adventure books, Bob also started on a fictional story about a colony on the Moon. Work began with detailed research on a fully functional, entirely feasible Moon base that could support its inhabitants indefinitely... in case the worst happened. After 8 years of research and 4 years writing, **Mother Moon** was published in 2015. Its success led to calls for a sequel and **The Dark Side Of Mother Moon** followed in 2018, with the final volume in the trilogy, **Return To Mother Moon**, appearing in late 2022. In addition, he has also published the Kindle-only **Inhabit The Moon**, which describes how mankind may live and work on the moon and came out of the research he needed to do to make the *Mother Moon* series as factual as possible.

Bob has also published **Twelve Twists of Fate**, a collection of his short story mysteries.
